

Allworx[®] Family of Products

Communication systems designed exclusively for small businesses

Whether your business has 10 employees at a single site or 100 employees at multiple sites, traditional phone lines, VoIP lines, T1 or T1/PRI, Allworx has a communications solution designed with your business in mind

Our commitment

Allworx delivers on the promise of VoIP telephony for small business by overcoming the daunting price and functionality obstacles of other suppliers.

Up to now, competitive product offerings have not made VoIP systems a realistic option for many small businesses — they're too expensive, they lack the full features of traditional systems and they're too complex to install and use.

Allworx has changed all that — with total communication solutions that break all the industry rules on price, functionality and ease of use.

The Allworx product family eliminates the compromises that small businesses have had to make when transitioning to VoIP technology — offering all of VoIP's benefits, without losing any of the traditional phone features you enjoy. There's no compromising for our customers!

How is Allworx different?

Allworx has focused on the small business from the beginning. That's why our differences count in ways that are most important to you:

► **More savings for you**

Allworx provides the absolute lowest installed cost of any fully-featured VoIP system and PC network, while delivering significant monthly savings for on-going communication costs.

► **Move at your own pace**

New technology can be daunting. That's why Allworx gives you the largest set of traditional telephone capabilities of any VoIP solution in its class! Now you can simultaneously use both analog and VoIP phone connections as you control the pace of your transition to new technology. When you are ready to take advantage of VoIP, you can do so seamlessly without disrupting your business operations.

► **No compromising on features**

The Allworx system is the only analog, VoIP and PC network solution with a complete set of features designed exclusively for the small business. Movement to this system can be accomplished with absolutely no disruption to your business. You get all the features you have...plus more.

► **It's got to be easy**

Whether you are installing a single site or linking multiple offices and remote users, no other system comes close to the simplicity and speed of an Allworx installation. And the simplicity doesn't end there. Our intuitive interface makes the Allworx system the easiest system to use and administer.

The Allworx family — a true all-in-one system
