Chapter 1

Getting started with Call Center

This guide explains how agents use Call Center.

Note: It is possible that not all features in this guide are available for your call center. Please check with your supervisor for feature availability.

About Call Center

Call Center is an application that handles incoming calls as efficiently and economically as possible. Call Center answers calls, then routes the calls to agents in a skillset that most closely meets the needs of the caller. If there are no agents available, the calls are placed in a skillset to wait for an appropriate agent. Waiting callers receive periodic announcements and informative messages.

Chapter 2

Call Center Agent Guide

Logging on to Call Center

Log on to Call Center so that calls can be routed to you. You cannot log on if the maximum number of agents is logged on, if you are logged on to another telephone, or if someone else is logged on to your telephone. You can log on only to skillsets that you are assigned to.

To log on from a two-line display telephone

- 1 Press **[*] 9 0 4**.
- 2 Enter your Agent ID and press **OK** or **#**.
Your Call Center Administrator can tell you your Agent ID.
- 3 Enter your password and press **OK** or **#**.
The first time you log on, or when you log on after your password has been reset, enter the default password, 0000. If you enter the default password, you must create a new password.
- 4 Press **IN** to log on to one or all skillsets. If **IN** does not appear, you are already logged on to all the skillsets, or there are no skillsets available.
- 5 Press **CHNG** until the skillset that you want to log on to appears on the display. If you log on to all of the skillsets, you are logged on to all the skillsets that you are assigned to. If there is only one skillset available to log on to, you are automatically logged on to that skillset.
- 6 Press **OK**. You are logged on to the skillset number displayed, or all of the skillsets if **ALL** is displayed.
- 7 If you are a Multimedia Call Center agent, the prompt **Also log in to PC** appears.
- 8 Press **[*]**.

Note: Multimedia Call Center may not be available for your call center.

To log on from a one-line display telephone

When you log on from a one line display telephone you also log on to all skillsets you are assigned to.

- 1 Press **[*] 9 0 4**.
- 2 Enter your Agent ID and press **#**.
Your Call Center Administrator can tell you your Agent ID.

- 3 Enter your password and press **#**.
The first time you log on, or when you log on after your password has been reset, enter the default password, 0000. If you enter the default password, you must create a new password.
- 4 Your agent name and **Logged into all** appears on the display to show that you are logged on to all of the skillsets you are assigned to. If you belong to only one skillset, **Logged into XX** appears, where XX is the number of the skillset you belong to. If **Logged out all** appears, repeat steps 1 through 3 to log on.
- 5 If you are a Multimedia Call Center agent, the prompt **Also log in to PC** appears.

Note: If you use a Companion 3060 telephone, there are no indicators, and the display does not show that you are logged on or the skillsets that you are logged on to.

Note: Multimedia Call Center may not be available for your call center.

Logging on to Multimedia Call Center

Note: Multimedia Call Center may not be available for your call center.

To log on if you are taking only voice calls

Log on to your telephone the same way you log on as a Call Center agent, as described in [“Logging on to Call Center” on page 11](#).

To log on if you are taking only browser calls

On your computer, click the **Start** button, point to **Programs**, point to **Nortel Networks**, point to **Multimedia Call Center** and click **Agent Notification**. The Agent Notification page appears. Log on to Multimedia Call Center.

For information about using Multimedia Call Center, click Help.

To log on if you are taking voice and browser calls

Log on to your telephone the same way you log on as a Call Center agent, as described in [“Logging on to Call Center” on page 11](#), and then log on to Multimedia Call Center on your computer.

What you should log on to

Ask your Call Center Supervisor whether you can receive only voice calls, only Multimedia Call Center calls, or both voice and Multimedia Call Center calls.

Note: Multimedia Call Center may not be available for your call center.

This table shows what you should log on to, depending on what type of calls you can receive.

Type of calls you can receive	Are you logged onto a telephone?	Are you logged onto Multimedia Call Center?	Can you have voice calls?	Can you have phone and browser Multimedia Call Center calls?	Can you have browser only Multimedia Call Center calls?
Voice	No	Not permitted	No	-	-
	YES	Not permitted	YES	-	-
Multimedia Call Center	No	No	-	No	No
	No	YES	-	No	YES
	YES	No	-	No	No
	YES	YES	-	YES	YES
Both	No	No	No	No	No
	No	YES	No	No	No
	YES	No	No	No	No
	YES	YES	YES	YES	YES

Logging off Call Center

When you are finished for the day or will be away from your telephone for an extended period, log off to stop calls from being routed to your telephone.

To log off from a two-line display telephone

- 1 Press **☎ 9 0 4**.
- 2 Enter your Agent ID and press **OK** or **#**.
- 3 Enter your password and press **OK** or **#**.
- 4 Press **OUT**. If **OUT** does not appear, you are not logged on to any skillsets.
- 5 Press **CHNG** until the skillset you want to log off from appears on the display. If you are logged on to only one skillset, that skillset is automatically selected.

- 6 Press **OK**.
- 7 You are logged off from the skillset number displayed, or from all skillsets if **ALL** is displayed.
- 8 Press .

To log off from a one-line display telephone

When you log off from a one line display telephone you are also automatically logged off from all the skillsets you are logged on to.

- 1 Press  **9** **0** **4**.
- 2 Enter your Agent ID number and press .
- 3 Enter your password and press . If you are logged on to multiple skillsets, **Logged out all** appears on the display to show you are logged off from all skillsets or if you are logged onto one skillset, **Logged out xx** appears, where xx is the skillset you were logged on to.
- 4 Press .

Note: If you use a Companion 3060 telephone, there are no indicators, and the display does not show that you are logged on or the skillsets that you are logged on to.

Changing your agent password

Your Agent ID and password give you access to the skillsets you are assigned to. Keep your password confidential. Change your password on a regular basis, approximately every 30 days.

To change your password from a two-line display telephone

- 1 Press  **9** **0** **4**.
- 2 Enter your Agent ID and press **OK** or .
Your Call Center Administrator can tell you your Agent ID.
- 3 Enter your password and press **OK** or .
- 4 Press **Admin**.
- 5 Enter a new password that is from four to eight digits long and press **OK** or .
Your password cannot start with a zero.
- 6 Re-enter your new password and press **OK** or . **Password changed** is briefly displayed.
- 7 Press .

To change your password from a one-line display telephone

- 1 Press **[*] 9 0 4**.
- 2 Enter your Agent ID and press **#**.
Your Call Center Administrator can tell you your Agent ID.
- 3 Enter your password and press **#**.
Your log on status changes from Logged on to Logged off or Logged off to Logged on.
- 4 Press **4** within the next five seconds.
- 5 Enter your new password and press **#**.
Your password cannot start with a zero.
- 6 Re-enter your new password and press **#**. **Password changed** is briefly displayed.
- 7 Your original log on status appears.

Using Feature Codes

You use Feature Codes to access Call Center features. The default Feature Codes are shown below. Your Call Center Administrator can program Custom Feature Codes that you use instead. If you use Custom Feature Codes, you can record them in the spaces below.

Feature	Default Feature Code	Custom Feature Code
Open mailbox	[*] 9 8 1	[*] 9 ___
Log on/Log off	[*] 9 0 4 *	[*] 9 ___
Supervisor Help (may not be available on your system)	[*] 9 0 6 *	[*] 9 ___
Activity Codes (may not be available on your system)	[*] 9 0 7 *	[*] 9 ___
Not Ready	[*] 9 0 8 *	[*] 9 ___
Display Waiting Calls	[*] 9 0 9 *	[*] 9 ___

*You can program these Call Center Feature Codes to memory buttons. For information about how to program a Feature Code to a memory button, refer to [“Programming a memory button” on page 20](#).

Note: While you are using a feature, if you press the Feature **[*]** button your present feature session ends. Do not press **[*]** unless you want to end your current feature session.

Log on

Use **[e] [9] [0] [4]** to log on to Call Center and the skillsets you are assigned to. You can program a memory button with the Log on Feature Code. If the memory button you choose has an indicator, the indicator shows your log on status.

- If the indicator is off, you are not logged on.
- If the indicator is on, you are logged on.

For information about how to program a memory button, refer to [“Programming a memory button” on page 20](#).

Supervisor Help

With Supervisor Help you can request help from a supervisor while you are on a call by pressing a programmed feature button. You can send an urgent request for help without interrupting the call, and without the caller being aware of your help request.

Note: Whether you can use Supervisor Help depends on the system your Call Center uses. Ask your supervisor whether you can use Supervisor Help.

Supervisor Help is for situations where you are on a call and urgently require the help of a supervisor without alerting the caller that a supervisor is being called in. It is not intended for routine consultations or when you are not on a Call Center call. You must be logged on to Call Center and on a Call Center call to use Supervisor Help.

To use Supervisor Help you must have a memory button programmed with the Supervisor Help Feature Code (F906). The programmed key must have an LCD indicator. The memory button can have a distinct bright color so it can easily be distinguished from the other buttons. For information about how to program a memory button, refer to [“Programming a memory button” on page 20](#).

Activity Codes

You use Activity Codes to allocate calls to certain activities. You can press **[e] [9] [0] [7]** to start an Activity Code session anytime during or after the call until your Break Time ends.

Note: Activity Codes may not be available for your system.

Enter Activity Codes early in your Break Time to ensure that Call Center records them.

If your Activity Code sessions are prompted, and you have not entered an Activity Code by the end of the call, your telephone display automatically prompts you to enter Activity Codes. It is recommended that you program a memory button with **☎ 9 0 7**. For information about how to program a memory button, see [“Programming a memory button” on page 20](#).

If your Activity Code sessions are prompted, and you park and page a call, after you park the call an Activity Code session will not automatically appear on your telephone. If you want to enter an Activity Code for the call, you can do it during your Break Time by pressing **☎ 9 0 7**.

The **☎ 9 0 7** session remains on your telset for 2 minutes, unless you enter an Activity Code or release the **☎ 9 0 7** session.

To have an Activity Code session

- 1 During or after a call, anytime until your Break Time ends, press **☎ 9 0 7** to start a session.

If you are prompted to enter Activity Codes, the **☎ 9 0 7** session starts automatically.

```
Activity Id:
RETRY      OK
```

```
Sales support
RETRY      OK
```

```
Another actv?
YES      NO
```

- 2 Enter an Activity Code number and press **OK**.
- 3 The Activity Code name is displayed, in this example *Sales support*. Press **OK** to confirm this is the correct Activity Code or press **RETRY** to return to the display on step 2.
- 4 You can press **YES** to enter another Activity Code or press **NO** or **RLS** to end the **☎ 9 0 7** session.

You can enter a maximum of 5 Activity Codes during a F907 session. You can have multiple F907 sessions during a call, and one session after the call ends.

Note: Ask your Call Center supervisor for the list of Activity Codes.

Display Waiting Calls

Use Display Waiting Calls to view information about skillsets and the calls waiting in skillsets. The table below describes the information in each display.

Display	Description
Skill 1: Enabled	shows the skillset number and the status of the skillset. The status can be Enabled, Disabled or Uninit (uninitialized).
1: 6 agents	shows the skillset number and how many agents are currently logged on to the skillset
1: 10 calls	shows the skillset number and the number of calls waiting in the skillset
1: wait 9:45	shows the skillset number and the time of the call waiting longest in the skillset.

To Display Waiting Calls

1 Press **[☎] 9 0 9**.

The skillset display for skillset 1 appears.

On a one line display telephone press	On a two line display telephone press	To
1	1 or GOTO	enter the number of the skillset you want to monitor
2	2 or SKILL	monitor the next enabled skillset
3 or 6	3 or 6 or NEXT	go to the next skillset
4	4 or PREV	go to the previous menu
#	#	go to the next menu
*	*	cancel the session
[☎]	[☎]	exit

Using Display Waiting Calls with a memory button

Program a memory button with **[☎] 9 0 9** to view the status of all skillsets, including the skillsets that you are logged on to. If the memory button you choose has an indicator, the indicator shows information for the calls for the skillset that you are logged on to.

- If the indicator is off, all of the calls are within the acceptable wait time.
- If the indicator is flashing slowly, at least one call has exceeded the first alert time.
- If the indicator is flashing quickly, at least one call in the skillset has exceeded the second alert time.

The Call Center Administrator sets what the alert times are.

For information about how to program a memory button, refer to [“Programming a memory button” on page 20](#).

Not Ready

If you use Not Ready, you do not receive calls. Your Call Center Administrator can also program a Break Time, which makes Call Center automatically wait a short time before it routes the next call to you. You can use the Break Time to complete any paperwork required by the last call. If you need some extra time, use Not Ready to prevent Call Center from routing another call to you. Do not use the Do Not Disturb feature. You can use Not Ready while a call is ringing on your telephone. The call that is ringing on your telephone goes back to the skillset.

It is recommend that you program a memory button with an indicator instead of pressing **☎ 9 0 8**. For information about how to program a memory button, refer to [“Programming a memory button” on page 20](#).

Note: While you use Not Ready, you still receive non-Call Center, intercom and transferred calls.

To use Not Ready

- 1 Press **☎ 9 0 8**. **Make Not Ready** appears on the display.
 If you press **☎ 9 0 8** and **Break canceled** appears on the display, you canceled the Break Time that the Call Center Administrator programmed for you. You must press **☎ 9 0 8** again to activate the Not Ready feature.
 If you press **☎ 9 0 8** and **Agent active** appears, the Not Ready feature was on and you canceled it. Press **☎ 9 0 8** again to activate Not Ready.
- 2 Cancel the Not Ready feature by pressing **☎ 9 0 8** when you are ready to take calls again.
 If **Not ready** appears, press **☎ 9 0 8** again.
 Not Ready is automatically enabled if you do not answer your telephone, if Not Ready is configured in Call Center.

Programming Not Ready to a memory button

You can have convenient, one-button access to Not Ready if you program a memory button with the Not Ready Feature Code. If the memory button you choose has an indicator, the indicator shows your busy status.

- If the indicator is off, Not Ready is off.
- If the indicator is on, Not Ready is on.
- If the indicator is flashing, the Break Time feature is on.

For information about how to program a memory button, refer to [“Programming a memory button” on page 20](#).

Programming a memory button

You can program memory buttons for one-touch access to Call Center features. You can program memory buttons for:

- Log on
- Supervisor Help (If it is available for your system)
- Not Ready
- Activity Codes
- Display Waiting Calls

You cannot assign features to Line, Intercom, Answer or Handsfree/Mute buttons.

Note: Activity Codes may not be available for your system.

To program a feature to a memory button

- 1 Press .
- 2 Press the memory button that you want to program.
- 3 Press and enter the feature code.
- 4 Use the paper labels that come with your telephone to identify the programmed button. To use the Feature Code, press the labeled button.

Memory button indicators

Memory button indicators are triangular icons (▶) that appear beside some memory buttons. If you program Call Center features on memory buttons with indicators, the indicators show additional information about the feature.

Other Call Center features

Using Automatic Answer

If you have Automatic Answer enabled, you can use handsfree to answer calls. An audible tone tells you that you have an incoming call. Ask your Call Center Administrator if you have Automatic Answer enabled. Handsfree calls are convenient and time saving because you do not have to use the handset or press buttons on your telephone. If you use Automatic Answer, be sure to activate the Not Ready feature before you leave your desk so that callers are not routed to your telephone when you are away.

How Automatic Answer works depends on what type of telephones your call center uses:

- **i2002 and i2004 IP telephones:** If you connect the headset before you initialize the phone, calls are heard over the speaker. If you initialize the IP telephone before you plug in the headset, calls go to the headset as long as you have initialized the headset by pressing the headset button and then the release button. Calls always ring at the IP telephone. Every time you reconnect the headset you must initialize the headset.
- **Meridian and Norstar telephones:** If you use a headset, calls ring at the telephone and the headset, but calls go to the headset.
- **Business Series Terminals:** If you connect the headset before you connect the telephone cable to the phone jack, calls goes to the handsfree speaker. If you plug in the telephone before you connect the headset, calls go to the headset as long as you have initialized the headset by pressing the headset button and then the release button. Calls always ring at the set. Every time you reconnect the headset you must initialize the headset. Calls always ring at the set.
- **T7316e:** This type of telephone is safe to use for Automatic Answer.

Transferring calls

If you have a caller who needs to talk to another person or is routed to the wrong skillset, you can transfer the call. Do not use the Call Park feature.

To transfer a call

- 1 Press   , or **TRANSFER** on a two line display telephone.
- 2 Enter the extension of the person or skillset.
- 3 Press , or **JOIN** on a two line display telephone.

Viewing call information

Your telephone display shows information about your current call.

While the call is ringing, the display shows the skillset the call came from. If your call center is configured to show the Caller ID first, the Caller ID is shown briefly followed by the Skillset name.

When you answer a call, the display shows the Caller ID of the caller.

While you are on a call, you can press the **INFO** softkey to display:

- the telephone number the caller is calling from
- the caller name
- the line the call came in on

Silent Monitor

Call Center Supervisors have the ability to silently monitor your calls, including personal calls.

If you make a call that you do not want to be monitored, first log off as an agent, then log on again when you complete your call.

Important considerations about using features

Activity Codes

Agents who answer a call on an Answer DN telephone or use Call Pickup on a call that is ringing at another agent's set cannot enter Activity Codes.

Note: Activity Codes may not be available for your system.

Call Transfer

You can use Transfer to transfer a call to another agent, another person such as a subject matter expert, or send the call back to a skillset.

- To send the call to a specific agent or another person, enter the Transfer Feature Code (**☎ 7 0**) and enter the extension number. For more information on transferring a call, refer to [“Transferring calls” on page 21](#).
- To send the call to a skillset, enter the Transfer Feature Code (**☎ 7 0**) and enter the CDN of a skillset.

If you want to transfer a call to a mailbox, use **☎ 9 8 6**.

Multimedia Call Center agents do not receive Call Center voice calls, but other Call Center agents can transfer voice calls to Multimedia Call Center agents.

Note: Multimedia Call Center may not be available for your call center.

Call Forward

Do not use Call Forward. If you use Call Forward you are automatically logged out or made busy, depending on your agent settings. You can use Call Forward to the voicemail DN.

Call Forward No Answer (CFNA)

If you forward a call by CFNA to another agent and the call is answered by that agent, because of your CFNA setting you are made Not Ready or logged out instead of staying idle.

Answer DN

The only way you should use Answer DN is if you program your portable set to be the Answer DN for your main telephone.

If you use your Answer DN telephone to answer a call that is transferred to you, Call Center does not recognize you as being busy, and still sends calls to your main set.

Agents who log on from a regular telephone and answer Call Center calls using an answer DN key from a portable telephone cannot use Supervisor Help (F906).

Do Not Disturb

Instead of using Do Not Disturb, use the Not Ready Feature Code (**☎** **9** **0** **8**). If you use Do Not Disturb, you are automatically logged out or made Not Ready.

Follow-me browsing (Multimedia Call Center agents only)

Follow-me browsing does not work with embedded Flash animations. If you click a Flash button, the image that you see is not displayed to the caller.

If the page you are sending to the caller contains Flash animations, you must explain to the caller how to display the page by (for example, clicking the Next button) or telling them what item to click on the page to display the next page.

Note: Multimedia Call Center may not be available for your call center.

Skillset mailboxes

Each skillset has a skillset mailbox assigned to it. Skillset mailboxes store messages left by callers. Check these mailboxes on a regular basis to ensure that customer messages are responded to promptly.

Checking skillset mailboxes for messages

Frequently check skillset mailboxes for messages. Only one agent at a time can retrieve messages from each skillset mailbox. If different agents access the messages in the skillset mailbox throughout the day, each agent should:

- listen to the message
- write down what the message says
- erase the message
- return the caller's telephone call

If the caller is not available, the agent can try again later or give the message to another agent. If only one agent retrieves the messages at your call center, they do not need to transcribe and delete each message before callback. This agent knows the status of the old messages.

To play messages in a skillset mailbox

- 1 Press **☎** **9** **8** **1**.
Follow the voice prompts or the display button options on your telephone to open the skillset mailbox.
- 2 Press **PLAY** or **2** to listen to your messages.
For other options, refer to the user card for your telephone or the *CallPilot Reference Guide*.
- 3 Press **☎** to end the session.
